This method is about a killer crypto strategy that's making people big money with minimal effort. Ready to unlock it? ?

? Step 1: Identifying Profitable Solana Wallets

There are several sites that let you track Solana wallet activity and identify the top-performing ones. Here are the best ones:

1. Solscan.io

Use this to monitor wallet activities, check trade history, and spot trends. Search for wallets with consistent gains and frequent successful trades.

2. Dune.com

An excellent tool for creating custom dashboards and tracking wallet performance with detailed analytics. You can filter and visualize wallet data to find the most profitable ones.

3. Birdeye.so

Specializes in real-time data and wallet insights across Solana. You can monitor token flows and spot profitable strategies from high-performing wallets.

? Step 2: Analyzing Wallet Performance

Once you find a wallet that's consistently making gains, look at:

- Frequency of trades: How active is the wallet?
- Token choices: What coins are they investing in?
- Profit margins: How much profit are they pulling in per trade?

Focus on wallets that show a clear strategy rather than random trading.

? Step 3: Automating with Telegram Copy Trading Bots

This is where the magic happens! There's a Telegram bot that lets you copy the trades of any wallet automatically. Here's how:

1. Use a Reliable Copy Trading Bot – [TradeWiz Solbot](https://t.me/TradeWiz_Solbot?start=r-LQSVR24L6Z)

This bot is specifically designed for Solana copy trading. It lets you input a wallet address and mirror every move automatically.

2. Setup & Configuration

- Link your trading account with the bot.
- Input the wallet address you want to track.

- Set your risk management (trade size, stop loss, etc.)

3. Let it Run on Autopilot

The bot will now copy every buy and sell the wallet makes. You can sit back and watch the profits roll in. ?

? Pro Tips for Maximizing Profits

- Diversify Wallets: Track and copy multiple wallets to spread your risk.
- Monitor Adjustments: Sometimes traders tweak their strategies. Keep an eye on major shifts.
- Adjust Trade Sizes: Start small and scale as you see consistent returns.

? Final Thoughts

This strategy is perfect for those who want to leverage the success of experienced traders without doing the legwork themselves. By combining wallet tracking with automated copy trading, you can stay ahead of the market and make some serious gains without stressing.

Don't sleep on this method – it's making people real money every day! ?? Give it a shot and let the profits speak for themselves.

Happy trading! ?

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Hmmm...I think this is way to risky to do. Most bots are just not good as they look.

Not all wallets are bots, it just shows a list of wallets that make profit most of the times. It takes around a few minutes to find one to copy.

Why do your own research if the numbers don't lie??

You only need a solana wallet, a good trading bot on telegram and a few minutes of your time to find the wallet you would like to copy. There are also bots that let's you follow the wallets and get

notified when they are doing a transaction.

If there are any problems, I am here to help!

Still working perfectly

The bot in the guide is also still working flawless.

I personally also use Banana gun.

Feel free to check it out!
