Thread: [I have \\$18 Million in TON - AMA](#)

Aeowulf - August 22, 2024, 6:04 am

I have \$18 Million in TON. I'm rich.

The twist: I've never bought any of it and my wallet has glitched out. Discovered after dealing with an issue where XMR [Mr_Kh4os](#) sent me didn't show up until I had to contact support.

So, deal with Atomic Wallet at your own caution. You may not get crypto you've been sent, but you may also end up a millionaire. IDK. Mileage may vary.

Did you try to withdraw/move anything?

It won't let me. It shows in my balance, but when I try to send or convert it doesn't recognize any of it. ?

This happened to a friend of mine years ago on Coinbase when they removed the ability to transfer I

think it was terra luna. His wallet glitched and showed him having like \$10 million. When he really had like \$25. He was just getting into crypto at the time, and I kept messing with him telling him he needed to pay taxes on it even if he can't withdrawal.

Oh I'd be FKN LIVID! ??

The transaction never came in, and that's all that's reported. So... I'm playing dumb! ??

That's crazy if it would be actually real. Atomic Wallet has been weird since forever

I don't know if this is exact same token you speaking about but it might be

<https://www.geckoterminal.com/eth/pools/0xaf81e930620eb55a9a6927c4b2afcb4d61040c32>

If not send me the address of it or look it up on that website yourself.

You have to look for things such as 24h Volume and the LIQUIDITY on this one it's \$1.48M so no way you can take more then that and beside most of them one are scammms are well planned I ain't even go onto details just yet, Il probably make a topic.

You are never rich and you never have money until you actually withdraw it to the bank and this is more complicated then you think, you can swipe coins from there to there but eventually you will have to declare it unless you get the real money cash some other ways which again nearly all of them are illegal.

Also remember each state in the world now started to tax all crypto and nft's , fuckers.
