Thread: [I have good stuff setup... but don't know where to spread. Know any websites?](#)

I have .lnk FUD always and if not sending files directly, an actual great way of linking someone to either .txt or .png or .pdf or something.

Do you know any websites I could target? My mind hasn't tried doing this in a while, but maybe you could help God give me an idea! :-)

Software download sites would be easiest.
