Thread: [making bands with AI onlyfans \(100%FREE\)](#)

big pimpin pig - August 23, 2024, 10:41 pm

wassuppp everyone

I got this very cool idea and I did my research and as far as I know, NO ONE here talks about it it's a pretty good idea for money making and it is totally legal and legit and 100% free no investment

the idea is making a fake ultra Realistic onlyfans model with AI and posting her on Ig and other Social Media to get traffic to her OnlyFans

how to make her you ask?

with AI and DO NOT USE midjourney or davinci Ai or anything else just use Fooocus AI (github.com/lllyasviel/Fooocus)

and its 100% free and opensource and you can modify it with Loras /checkpoints

but on its own it can make a pretty good pics BUT not ultra Realistic and human like

how to solve this?? just use this checkpoint

(civitai.com/models/139565/realistic-stock-photo?modelVersionId=524032)

it will make you ultra Realistic photos but on its own it will not give you any NSFW pics but i found a solution just use this Lora with it (civitai.com/models/248856/fappxl-multi-nsfw-concept)

(BTW YOU HAVE TO BE LOGD IN to view it cuz it got some spicy pics)

and you can make a consistent character in ai so its the same girl every time Here is a good vid about it on YT (Create CONSISTENT Characters With FOOCUS AI)

how to use Loras and Checkpoints?? dude just search it up on YouTube

and BTW YOU DONT NEED A 4090TI to use it I DONT EVEN HAVE A GPU JUST USE IT ON GOOGLE COLAB its in the GitHub link of fooocus

and you can get aloooooot more loras and Checkpoints on a site called civitai.com to get things like AHAGO and all kinds of positions for the girl but make sure all the Loras and Checkpoints are a SDXL or SD based

after you have made your dream girl make her a fanvue or a Patreon acc or both and market her on Instagram for some good traffic and btw fanvue pay you in crypto so thats pretty cool

and fanvue don't care if its real or not (no need for ID ver or anything like that) and Patreon im 95% sure they allow AI too

i don't have much time right now to do it but after a month I have all the time in the world to make myself an empire with fake girls on the internet

soo what do you all think????

btw if anyone did it please tell me in replies here alright??

Wont work there's too many detection softwares

Blockonome - August 24, 2024, 12:06 pm

This seems interesting, but I would like to learn more about it.

I'm 90% sure there is a way around it by erasing the metadata of the photo in Adobe Photoshop I'm working on it

but remember a lot of people like henta! too and i saw a video of a guy who did the same thing and he said "From his experience AI models are even better then real ones cuz people like to see new things and don't really care if she is real or not" but I personly not really sure about that

you can!! look it up on YT there are alot of YouTubers talking about it but no one here does watch this video on yt by Fireship (AI influencers are getting filthy rich... let's build one) sry I can't post links

the video is very basic but serch things like (OF AI models) and theres a yt chanel (OFMkyle) they have a OFM for ai girls but they are total d!cks just two dochebags flexing money and they use the worst most obvious PAID?? ai ever

BUT they know a thing or two about OF marketing

I found that the best way to make money online is with any type of NSFW content

I'm gonna make a journey and update it every week until I get something like 25k \$

Seen this on Youtube!

Only barrier here is OF requires ID?

I tried it
I posted one of my models on IG without erasing the metadata or anything about 10H ago
and until now she didnt get the "made with AI" tag

she is wayyyy to realistic that not even a billion dollar company can realize that
and on the hugging face AI detector (<https://huggingface.co/spaces/umm-maybe/AI-image-detector>)
she passed as a real life human when she is an AI

she looks too real cuz she is not ultra perfect human ever with the smoothest skin ever and the most professional photography

yah sadly
BUT
you can buy a verified OF account for about 25\$
but I'm not gonna do that cuz i don't even have a PayPal and my country is banned in onlyfans + onlyfans does not allow AI at all and buying a verified account could get banned very fast
so I will use Patreon as it allows AI and have payout option with payoner (works for me)
2nd option is Fanvue as it also allows AI and has a payout option with Crypto
3rd option is Fansly but I'm about 75% sure they don't allow AI and they also want some havey ID ver for the girl but they also pay in crypto
But I'm sure that Fanvue also needs ID but just to make sure that you are over 18 they DO NOT CARE if the girl is real or nah
Patreon also needs ID to make sure you are over 18 but they also allow AI

Good Luck !!!

lol im gonna try this out. incels pay for anything so long as they get to rub one out of it, so i think it doesn't matter if it's verging on hentai/ai art. thanks for the idea, this was a creative method.

Mischievous Bot - August 26, 2024, 1:37 pm

Thanks for posting man,
Love to see the actual tools and everything you mentioned.
I might try this out too.

Here's a summary of useful information for anyone who might want to jump in and collaborate:

Fooocus AI : github.com/lllyasviel/Fooocus
Checkpoint : civitai.com/models/139565/realistic-stock-photo?modelVersionId=524032
Lora : civitai.com/models/248856/fappxl-multi-nsfw-concept

more Checkpoints and Loras : civitai.com (make sure all the Loras and Checkpoints are a SDXL or SD based)

AI Face Detector : <https://huggingface.co/spaces/umm-maybe/Al-image-detector>

YOU DONT NEED A 4090TI to use it I DONT EVEN HAVE A GPU JUST USE IT ON GOOGLE COLAB its in the GitHub link of foocus

you can buy a verified OF account for about 25\$ (will probably get banned)

Patreon allows AI

Fanvue allows AI

hey np

btw its a good idea (the hentai) you could start a Twitter (X cuz i hate Elon mask) and be a hentai artist then u could start a Patreon and sell your art there and ofc u can make custom art for furies and anyone who wants with a click of a button

funny thing is I posted this method for free while 99% of people are gonna sell it to you saying (HOW TO MAKE 100K\$ in a DAY JUST PAY ME 50\$ IN BTC AND BE RICH) LMFAO

good luck dude update me if you get anything alright

will you sum it up really good ngl

Husypunter - September 13, 2024, 2:28 pm

I have been researching this and making content to see if the picture and vid results are believable for me or not, its been 1.5 months, and I'm at the point of launch, the only barrier I'm having is a robust payment system,

OF - requires timely verification, sometimes they ask to re-verify after a few days/weeks, especially when its AI

Patreon - no explicit adult content allowed, nsfw is allowed, i see many people throwing patreon in this niche, but no proofs, their own policy says, AI is allowed but no explicit s*xual content.

Fanvue - requires ID for the girl in the pics, they say AI is allowed but no DF, I read many people complaining in the internet, that they accept your account, but while making a large payout they ask for verification document of the AI girl, what the actual F, ???

Fansly - same boat as fanvue

Now I'm stuck, without a payment processor I do not want to launch, any suggestion and updates are welcome, I would be very much open to sharing our ideas on a chat, and tell things in detail which I have learned, and would love to gain knowledge from you too.

yehyh - September 23, 2024, 6:11 pm

cool stuff but can I ask why specifically Fooocus ai and not other ai (not that I mind, just curious)
