Thread: [Mine crypto from a hacked server](#)

th3sinbad - August 24, 2024, 4:38 pm

Hi there

I hacked a website and managed to upload a php shell on it (the good old c99), i want to know if there is a way i can mine cryptocurrency with it, a script or something.

InspectorGadget - August 24, 2024, 4:40 pm

You would likely need to mine via CPU, as most web servers are likely to not have a GPU.

The CPU is likely to be specced for running a web server too, so i doubt you'll get any sort of speed to care about.

Im not in a rush so just humor me

Whats the process of doing it

Do you have any example of anyone who has done this before?
