Thread: [how can i bind 2 exe files into one](#)

downbaddy - August 27, 2024, 7:49 am

For example if i wanted to send an legit installer to someone that also has a rat in it

You can do this with msfvenom using the '-e' flag to pass another executable. Bear in mind that malicious binders are not FUD. You can bind two completely harmless applications with a binder, and antivirus will detect it.

you can do it in this way:

- 1- create sfx archive contained your files
 - 2-compile the sfx archive with batch to exe technique
- done!
you should crypt your final file !

Don't crypt a SFX archive. It will do no good as SFX files are not inherently detected, and the compressed files will be dropped to disk.

you can do with a simple command using cmd.. you need to crypt your output though
