Thread: [how to create a webpage to obtain someone's ip address](#)

DryRiver - August 27, 2024, 7:11 pm

how can i make a fake webpage to send it to someone to get their ip address ? and is there a legit website to tell me all the information related to that ip address ?

M?tt - August 27, 2024, 7:29 pm

I was feeling nice today and saved you the trouble:

<https://www.google.com/search?q=send+a+link+to+grab+an+ip&oq=send+a+link+to+grab+an+ip>

You don't even need a webpage or server to host the webpage.

As far as what to do with the IP address, you can start here:

<https://start.me/p/L1rEYQ/osint4all>

<https://www.advisor-bm.com/osint-tools>

thank you for this reply !!!

but holyyy what is this list of websites for ahahah

<https://start.me/p/L1rEYQ/osint4all>

this website seems interesting !!!

You asked for a way to find information regarding the IP address. Some of the resources in there will help you find it.

Completely unrelated OSINT tools.

IP address assignments are highly privileged. It takes more than OSINT.

If you don't want to use a site like #, you can set up your own Apache, nginx, or IIS server. Client IP addresses will be logged on each connection.
