Thread: [Astolfo Loader / MASS LOADER / C2 / NATIVE / C++ STUB / GO SERVER / 50\\$ BUILDS](#)

AstolfoLoader - August 31, 2024, 12:05 pm

Yeah i aint dealing with this no more message me if you want to buy source ill sell for cheap else this is closed ;3 also no telegram message me on like signal @astolfoloader.01 i think or like just pm me on hack forums [contract=tid]Start Contract[/contract]

Py_Dev - August 31, 2024, 1:54 pm

I have reviewed this product as a Vouch Copy:

Overall, 7.9/10

Bot: It is coded in c++. All tasks work as expected. Connection was fast! Only downside was the .exe was rather large after encryption. 1.43MB. Uncrypted it was 320kb.

-See verify pictures of my statements below-
Spoiler [\(Click to View\)](#)

Panel: I love the panel. Super nice design and sleek. All tasks, statistics and everything worked flawlessly. The seller was nice to speak with and was very helpful through the process.

-See verify pictures of my statements below-
Spoiler [\(Click to View\)](#)

Kleen Scan Results [HERE](#)

I would consider this as a serious option! Great overall tool to have in your arsenal! Worry free as he hosts the panel and compiles it all for you. Relatively cheap for what you receive. Good luck with sales Op!

hendrikpal - September 1, 2024, 12:47 pm

So this is fud crypt or crypter provide?.

Matt Walsh - September 1, 2024, 8:56 pm

did you code this in thigh highs?

AstolfoLoader - September 3, 2024, 6:42 am

(Sep 1, 2024 12:47 PM)hendrikpal Wrote: [\[CITE\]](#) So this is fud crypt or crypter provide?.
It comes fud i pay a crypter, to crypt each stub

(Sep 1, 2024 08:56 PM)Matt Walsh Wrote: [\[CITE\]](#) did you code this in thigh highs?No comment.

DarkSeek - September 20, 2024, 3:21 am

Is this different to Jinx loader?

I just saw the bit where it says Jinx redone in C++. Why was it redone? is the payload smaller than 5MB this time?

Also, can we not host the panel ourselves. I never get the point in buying a botnet hosted by someone else. Smokeloader for example, you get the panel files and a payload. I don't want to rely on someone else for hosting and I don't want anyone to have access to my net.

OSVapor - September 20, 2024, 8:53 am

Hey bud, I reached out before on Jinx loader and was going to buy lifetime. Would you give me a vouch copy to trial this? Happy to thoroughly test and give a detailed review.

Its redone so I can add my own features to it or improve it, yes the payload is about 300kb unencrypted

Pm me on telegram and we can discuss self hosting

Coded using Arch Linux™

magichack3r - October 9, 2024, 8:42 pm

I have tested the loader and it is very good and stable. For personal reasons I was only able to load a test of about 300 or so bots and it worked flawlessly. I recommend the product, good quality and at an excellent price.

Doesnt matter.

Threat actors are not often weebz and either wont notice or won't care.

Imagine going to jail for selling this and explaining to bruce in cell block 8 youre in jail for peddling
malware via seductive cartoon ads.

thats fucking embarrassing.

Dm if you want own hosting

RUSSIAN COUNTRIES ARE BLOCKED ON MY LOADER IN ORDER TO SELL ON RUSSIAN SITES!!!!

Frequently Asked Questions (FAQ)

Q: Are vouch copies available?

A: Yes! Vouch copies are available if you crypt them yourself. Alternatively, you can use the startup stub that Jinx Loader used. Must have good amount of rep

Q: How can I verify the authenticity of the source?

A: I am one of the buyers of the source. You can go to [@rendnza](#) on Telegram to verify.

Q: Do you accept middleman?

A: I accept Cooligan <3

Vouch
