Try Cromartie Highschool, it's very short but better than Gintama imo.

Grand Blue, Arakawa Under the Bridge, and Space Dandy. I think they're really funny with great art/animation.

You may enjoy Arakawa more on shrooms/weed, since the art is very vibrant.

Episode one was very trippy. Also, it helped that I loved Mei Mei and Utahime.

Not that anyone asked.
I asked.

haha I meant like you'd die if you just ate a random mushroom lol but yeah the difference between
shrooms and weed is not even close to the same.
However I enjoy smoking weed while on shrooms when they're not kicking in.
You should try them one day and think about me my friend ?
