I tried sending test emails from 5-6 SMTPs and mailer listed in your shop. Not a single email arrived. Is the "test send" functionality working?

Hey man I been seeing your post on others who are advertising cracked SMTPS. Want to know if you found any reliable sellers.

PLEASE point me in the right direction. Been looking for a while

Yes

Wispr - May 3, 2025, 7:21 am

You should also sell scampages

Quelqu'un Connais un bon Vendeur de tools et de bonnes mailist ? [warn]

GOD-MODE - July 30, 2025, 2:50 am

I came to your website with sole intention of buying good tools. please see few issues for you to know

Your site not update after \$50 payment? You claim to update automatically after 3 confirmations. 50 confirmations later your site still stuck and it forces a 50 usdt trc 20. Payment credits

Your SMTP are actually generic. Your seller(s) are putting usernames from just 1 domain and selling them I wont state the domain but you get the message.

Your webmails almost face the same problem as the SMTP

Cpanels Much got good one. checker is not really effective.

@OP Please get the site to run faster Everything looks Good and the future is cool reminds me of Odinshop.to

Do you have Barracuda SMTP?

Feedback on This Store

I was searching for a shop that sells SMTP accounts and came across this website. To test it out, I added \$10, and the transaction went through successfully. I bought SMTP accounts from the site, but they all had limitations. I added another \$10 USD and bought more SMTP accounts, which were also all limited.

Note: They do not offer refunds, even if the SMTP account you purchase has a password error. This is very bad for business—how can you refuse a refund when the SMTP login is invalid? Spending \$2 USD on each SMTP without any replacement is a complete rip-off. As a result, I was too scared to try any of their other products.

Overall rating: 2/10

Reason for the 2: The deposits work, and the limited SMTP accounts are plentiful ("flooded").

Bad quality service

The Joker - November 19, 2025, 5:57 am

I got a question about RDPs listed in the site. The duration or validity isn't listed there.

Do I get a refund/replacement if they don't last for the given duration?

ikontransport7 - December 30, 2025, 3:49 am

bro you need to fix the email testing feature of the cpanels. Instead of testing using the domain linked to the cpanel, it is testing using the WHM domain meaning cpanels that shows "email sending as ok" end up not working after i bought it. example is order ID WB8i1dWaNyOi
