Thread: [Instagram Reel Boosting Service \[BEAT THE ALGORITHM\]](#)

Engima - September 3, 2024, 7:54 am

Hello everyone,

I am an Instagram content creator who built an Instagram profile from zero followers to 35.6k in just 5 months for personal branding using Instagram reels and workers.

I have 3300 worker that I give orders to share my reel and comment whatever I want to boost my reel whenever I post a new one.

What I am offering?

1. A small explanation of how I made viral reels and what steps that I carefully did in my reel in order to have the requirements of it to be viral.
2. Around 100 out of my 3000 worker (REAL PEOPLE) that can comment, share and like your reel to give it the boost.

I'll be offering this service for 49.99\$ in BTC or ETH and you'll get the method and 100 of my workers to boost your Instagram reel.

Send me a message for more details or customized offer.

Might want to be a bit more clear. Also 100 people sharing your reel doesn't beat your post hitting the explore page to millions of people so unless you are guaranteeing hitting explore it sounds like 3K artificial accounts boosting your posts.

I do agree with you but from my experience, whenever I post a new reel there are some stuff that boost it to be more able to go viral such as making my workers comment or share my reel.

Also, these are not artificial accounts, they're real people using their own personal accounts.

No bots or proxies or any such thing is used during the procedure.

So you say you are offering 3000 workers, but then you say we only get 100 workers? Am confused.

Maybe I didn't explain correctly sorry about that, I meant I can offer up to 3000 worker but the offer is 100 worker + the method.

Also, I can offer just the workers or just the method.

Yeah also didn't you just tell us the method is getting 3,000 worker accounts to interact with our post?

Nope this is not the method at all, it's just a boosting factor.
