Thread: [Fastest way to earn just \\$1500 USD?](#)

bluewaters - September 6, 2024, 3:28 pm

I am short of about ~\$1500 USD from buying a new bmw, and my first car ever

I invested the last money i had into launching my own memecoin, gave it to my project manager but he used it as an exit scam and ran away. i need that money to buy the car, and since the car is in excellent condition, brooklyn grey, 2022 model etc, its gonna sell out real quick. I need to buy it Fast.

The only source of income so far is from my 9-5 job. Im a dev.

Anyone knows a fast way to earn \$1500 USD, and when i say fast i mean 3-5 days?

If anyone also has a job that needs dev work i can do that too, tech stack:

- nextjs
- web3 dev
- python telegram bots
- angular
- devops (AWS, Azure, GCP)
- java spring boot

nah not really. with my next salary i will have the money for sure but waiting for a month is too long right now. i wouldnt be stressing if time was not important. even by borrowing this, i could pay it back by 5th october. but so far nobody wants to lend
