Thread: [other websites like shodan.io?](#)

SanuaWasH4re - September 10, 2024, 10:00 am

im looking for other websites like shodan.io

0x77ff - September 10, 2024, 1:01 pm

Why? why would you want a shodan alternative? Shodan is already extremely powerful so sorry for asking but why?

notagh0st - September 10, 2024, 1:03 pm

Security Trails by Recorded Future is good: <https://securitytrails.com/>

And Alien Vault endpoint search has some of the same data, though it's mainly used for malware research/APT tracking: <https://otx.alienvault.com/>

Hi, welcome to HF!

Shameless plug, but Censys is great. Shodan still needs you to do a manual scan, while Censys already populates ports without you asking. Also the historical data is very useful. Of course there's some bias here because I worked for them for a bit.

[Here's their pricing table.](#)

Cheers!

Fofa.info is pretty good! Also allows you to visit via VPN unlike Shodan which seems to block most VPN's (cloudflare moment).

As mentioned Censys, but Binary IO is also good.

Zoomeye as well.
