Thread: [PS5 Pro has been announced](#)

Undead - September 12, 2024, 10:12 pm

Personally, don't see much difference between compared to PS5 considering the price. It also doesn't come with a disc drive or a stand, you have to purchase these separately. Sony is starting to act worse than Apple.

Available: November 7, 2024

Preorders: September 26, 2024

Price: \$699.99 USD, £699.99 GBP, €799.99 EUR, and ¥119,980 JPY (includes tax)

Tech specs:

It will include a 2TB SSD, a DualSense wireless controller and a copy of Astro's Playroom pre-installed in every PS5 Pro purchase. PS5 Pro is available as a disc-less console, with the option to purchase the currently available Disc Drive for PS5 separately.

The big three.

Upgraded GPU: With PS5 Pro, we are upgrading to a GPU that has 67% more Compute Units than the current PS5 console and 28% faster memory. Overall, this enables up to 45% faster rendering for gameplay, making the experience much smoother.

Advanced Ray Tracing: We've added even more powerful ray tracing that provides more dynamic reflection and refraction of light. This allows the rays to be cast at double, and at times triple, the speeds of the current PS5 console.

AI-Driven Upscaling: We're also introducing PlayStation Spectral Super Resolution, an AI-driven upscaling that uses a machine learning-based technology to provide super sharp image clarity by adding an extraordinary amount of detail.

Does anyone else miss the days when a new console had new features, instead of the same games and features just faster?

I used to follow new consoles so closely and constantly be on the lookout for leaks on features and abilities and now it's just the same shit just a bit faster, still have loading screens, and the graphics are sometimes better in some games.

When the PS4 Pro came out, it was like a next generation console compared to the PS4. It was reasonably priced as well. Something has gone very wrong with Sony, almost like they're just trying to scam people now.

(Sep 13, 2024 12:47 AM)Lowkey Wrote: [\[CITE\]](#) All they have to do now is announce a good game. They failed hard with Concord haha

RangoWorld - September 13, 2024, 5:48 am

This PlayStation generation has been very underwhelming compared to PS4. Still waiting for that big next gen PS5 game.

MyHighness - September 13, 2024, 5:53 am

\$700 for a Playstation, damn! Inflation has gotten so bad.

Undead - September 13, 2024, 9:07 am

(Sep 13, 2024 09:00 AM)Sox Wrote: [\[CITE\]](#) \$700 for a console..

They've lost their minds. Common Sony L.

Yeah, Sony has been taken over by idiots. The same people who approved the ugliest console design in PS history.

illuminati? - September 13, 2024, 9:35 am

Eh. Seems like a waste of money these days.

You could use that \$699.99 to buy new parts for a pc.

TopM - September 13, 2024, 3:26 pm

Yeah I'll be honest the PS5 Pro seems a bit meh. Didn't help that the showcase was really quite shite, made it look more like a device to play PS4 games better than a meaningful improvement over the PS5.

Also no launch titles is weird.

DemonAsylum - September 14, 2024, 1:07 pm

The way these companies talk about the next mainline consoles every time such as Xbox Series X and PS5, you'd think these kind of specs on the PS5 Pro are what THOSE consoles should have already been getting. Regardless, \$700 for a mid generation console, upgraded hardware as it may have, is too much imo. I'm sure many out there who get physical copies of games are saying it all the more to as the pro doesn't have a disk drive built in, correct? You have to go and buy that separately on top of the \$700 pro itself lol?

Then even with the console itself aside, I don't believe it's releasing with any new major games if any at all and the list of games that will benefit supposedly a lot from the pro is meh. The upgrade from a base PS5 to the pro just doesn't seem worth it given the price tag and current state of gaming on there.

IntelPanda - September 14, 2024, 1:24 pm

Waste of money, not many attractive titles and I don't think it'll handle GTA VI like it's meant to.

nectar - September 14, 2024, 1:59 pm

With that price, you might as well spend a bit more and get a starter PC, especially when you add in the disc drive and stand. Also, not even very many games will support the PS5 Pro features, most of them will play the same as a regular PS5 as of right now. Do better Sony.

mediocool - September 15, 2024, 2:09 pm

Many options to can buy with that money new Xbox, 799 snack for 1\$ each

F4tDoinkz - September 15, 2024, 2:25 pm

Yeah this price point is terrible imo. Sony basically has no competition right now and they are charging an absurd amount for this with minimal upgrades. Games still release on ps4. There are barely any exclusives that will even take advantage of the hardware.

Vip?r - September 15, 2024, 2:36 pm

At this point/price why not just buy a PC and crack games?

Yin Yang - September 15, 2024, 2:37 pm

DashPHP - September 15, 2024, 2:41 pm

Honestly haven't paid attention to consoles in years.

I did watch Linus tech tips vid on it coincidentally and eh, not worth the upgrade

Mercury - September 15, 2024, 3:45 pm

That MSRP is fucking crazy. I know the economy is inflated, but damn.

Lil Buddy - September 15, 2024, 5:21 pm

Once i saw that it was \$700 i shit myself.

D707 - September 15, 2024, 10:09 pm

Here, me still using PS3. Still suitable for me.

Sony going to monopoly the console like apple do.

Undead - September 15, 2024, 11:35 pm

Good on you, man. I was thinking of getting a PS3 as well. There are some classics on there.

Not just the disc drive you have to buy separately on top of the \$700 but also the vertical stand which probably costs them less than a dollar to manufacture.

Beherit - September 16, 2024, 9:25 pm

Even though I've only bought PlayStation back in the day, consoles just aren't worth it anymore.

\$699 is enough for my PC upgrades that will show noticeable differences in performance.

TopM - September 17, 2024, 1:09 am

It's a real PS3 launch price cock up, wonder if Xbox are frantically trying to find a way to undercut this for their midgen refresh.

elcrook - September 18, 2024, 9:05 pm

some day all these console players will understand how far ahead and more fun PC gaming is, specially with games that have community servers and you get to troll / interact with people

for \$700 you can build a decent PC using used parts instead of getting a console

denisDeMenace - *September 21, 2024, 8:26 am*

The price sucks but I will buy it when GTA 6 comes out. I am not a console gamer but I want to play GTA 6 on launch day and not wait a year for the PC edition.
