Thread: [Which is the best silent crypto miner \(Unams SilentCryptoMiner or PureMiner?\)](#)

johnsmith57365420 - September 13, 2024, 9:10 am

Hi, so as the title says "Which is the best silent crypto miner (Unam's SilentCryptoMiner or PureMiner?)"

Also, is anyone able to confirm as to whether or not PureMiner could handle 10,000 even 100,000 clients and what this depends on such as PC specs rather than the program itself?

IntelPanda - September 13, 2024, 9:47 am

PureMiner can handle that many clients & it depends on your network and hardware + server capacity

johnsmith57365420 - September 13, 2024, 9:50 am

Thanks ?

Hect0r - September 13, 2024, 4:28 pm

I have never tested PureMiner, but reading various threads on the forum I seem to have understood that it is an excellent miner, moreover the support in case of problems always seems to be there. I think it's better than Unam's.

SIM-63814 - September 13, 2024, 6:50 pm

Unam's miner can mine with both CPU & GPU at same time. Pure will only do it with one: with GPU if a PC has it installed. But it won't mine with CPU too then. It plays a big difference in earnings at the end.

This is why I vote for Unam's. It will earn more money at the end, and it's free & open source. With a bit of coding knowledge you can customize it for yourself however you want.

Delfin - September 14, 2024, 11:55 am

Both are very good and very well made tools. PureMiner is really good in the sense that it includes a really cool (and also secure) C2 for controlling your miners' operations. However, I'd personally choose Unam's miner for the simple reason that it's free and open source. For an open-source project, it's extremely high quality and well developed. Both tools are good, and if you're planning on starting a mining botnet, you could look into using PureMiner over Unam

timmi888 - September 21, 2024, 10:49 pm

im trying to use unam miner but the 30mb output file just keeps crashing

Use compression dear.

I wouldn't even bother worrying about if the miners can do 10,000 clients, it is hard enough to find something stable to host 500 clients and keep them consistently with the current state of crypting.

Firstly, I tried it and it didn't work, even the latest version, I suspect that Windows (even with Windows Defender disabled, or using a crypter) prevents Unam's SilentCryptoMiner from running, I read it was a Windows Update that may have been silently installed on every Windows computer due to how many machines were hit by the virus (being the most popular crypto miner).

If you want to try it, search for the GitHub page, in the comments they've spoken about where to find it, there's a MEGA link.

I could've sworn I set it up properly ?

S3cr3tKill3r - May 27, 2025, 1:34 pm

PureMiner is the best silent mining product

etizolamvondor - June 3, 2025, 2:44 am

(May 27, 2025 01:34 PM)S3cr3tKill3r Wrote: [\[CITE\]](#) PureMiner is the best silent mining product agreed

dashking11 - June 7, 2025, 5:09 am

I think PureMiner is better but unams could handle the same load i think
