Thread: [Does SQL injections still work?](#)

Maalss - September 16, 2024, 10:28 am

Can a sql attack such as coming from sqlmap still be effective against websites that are not very well protected?

Bastille - September 16, 2024, 9:47 pm

If they are not well protected yes, SQLi is not as common as it was a decade ago but it still exists :

In "Injection" you have all kind of injections, not only limited to SQL

AmadeusHF - September 17, 2024, 7:43 am

yes, sql injection still work, i can confirm

elocuente - September 18, 2024, 4:40 am

???

Nightshader - October 7, 2024, 7:59 am

Sadly its not like it was a decade ago like Bastille said. But theres still plenty out there ive seen alot of philipines websites with the vulnerability ;) Do some sqli dorks in google and you will see what i am saying.

Biggy_Asian - October 7, 2024, 8:49 am

Yes they do if the system is vuln to it and if you can also bypass the WAF for it. It is a lengthy process well can be anyway...

pr0xed - October 17, 2024, 7:07 pm

not as common but you should still study the vuln

TheGoldenRelik - October 18, 2024, 10:50 am

Yeap still works, even in 2024....

person123! - November 21, 2024, 2:43 am

yeah they still work
