Thread: [\[Steam\] Black Ops 3 - Multiplayer Prestige Mods](#)

M?tt - September 19, 2024, 7:53 pm

Does anyone mod prestige or anything these days? I was maxed out on Xbox and I honestly don't feel like grinding for the weapons and such again. Even if it's just Prestige 0 Max Level, I'm cool with that. Just looking to have everything unlocked and enjoy multiplayer.

Kaleb - September 19, 2024, 9:58 pm

Black Ops 3 multiplayer is fucked right now. It's down for like half of the US and there's some exploit that I believe lets people ban your steam account from accessing multiplayer and possibly even remote code execution, if you're talking about on PC at least.

https://youtu.be/MzaCjo_RC1k

Incredibly annoying because me and a few friends bought it literally last week to play zombies together lmao.

That's fucked i did not know that. I liked playing all the custom zombie maps with my friends aswell ?

Ivanka Trump - September 20, 2024, 9:02 am

Unfortunately most of the older COD games are ruined on all consoles & PC.

Either they have ban exploits through Steam on PC or they lock you and ruin your game through JTAGs on Xbox.

Sad to hear but the dev teams no longer uphold and support most of the older COD games and it's servers, which is the main reason alot of people can easily hack/mod.

Guess I'll just stick to playing Zombies with mods offline. ?
