If you BTC for BTC you take risks. Mixers are not 100% reliable places. Convert BTC to XMR. Then convert XMR to BTC.

I have previously shared a guide for sites that do not require KYC.

(Sep 1, 2024 01:32 PM)poc Wrote: [\[CITE\]](#) There is a special guide for exchange and this guide lists the sites that do not require KYC.

Exchange sites

Strict no-KYC policy sites

If you still want a mixer, check out this thread. But like I said, I don't recommend it.

This clearly went way over your head just like the repeated threads/posts you make asking the same thing over and over.

Best of luck, however from what I gather you've probably ran over your own trail already ?.

Most of "Coin Mixers" are on feds's eyes. I'd suggest to swap to XMR and back.

Simpleswap is the way to go.

Step 1. Convert to XMR

Step 2. Convert XMR back to a coin.

Voila.
