Thread: [Amadey botnet 2024!!](#)

Djam_01 - September 26, 2024, 4:54 am

it's been a long time.

Hello HF.

I'm wanna back to the game, i know how things work (Setup, spreading, monetizing,....etc)

I Bought a loader, and want a good botnet for 2024 (stealer, clipper,...) or, I know how to code with C#
should I find a good source code and edit it.

For those who want to collobrate or have any question feel free to message me

Thanks <3

If you want assured quality, I would definitely go straight for Amadey. It's been around for a good couple of years, gets regular updates, has plugins, and is just all around well made.
