The method will be chosen based on what this 100k ppl are, what the profile nitch is and etc...

But everything comes to few things at the end:

1. Good social engineering, because at the end you want to make someone do something so you can benefit from it.
2. Legal or not, this is the thing where you think about do you want something for long term or quick good cash? If you want to be long term start to think about legal ways to monetize it, but keep in mind this takes time if not think about blackhat.
3. Your own abilities and knowledge of how things work and how to make money from them.

Share bit more and i can give you few advice on both ends.
