FAQ

QUES: What is the AWS accounts vCPU Limit?ANS: Our AWS account comes with varying vCPU limits. It usually comes with a default 8-32 vCPU.

QUES: Are these AWS Accounts Verified??ANS: It was created and verified with Virtual Card and SMS. Most times, we create a dummy instance in it for warm-up??

QUES: What is the region of the Account??ANS: Most of our accounts are from the USA. Sometimes we create in other European countries

QUES: Is it possible to increase the vCPU limits??ANS: Yes. You can increase the limit for your desired service after a few weeks of account use.
