Thread: [Attachments for Bytes Price](#)

I have lowered the minimum from 250 to 100 Bytes for attachments. It was originally 10, people advised to raise it but 250 probably a little high. I think 100 seems reasonable level for now.

Thank you.

Thank you for this. I think 100 is very reasonable rather than 250. It was a bit steep.

I agree, 250 bytes was a lot, let's see how people (and especially the new members) will react to this

100 bytes seems alright. I imagine it will reduce the number of troll/fake/malicious attachments since it won't be as quick/easy to attach a file.

I think 100 is perfect. Great change.

Me too, but they said 10 is not enough, thats why omni increased it

I think 100 is a good price.
