Thread: [No distribute file scanner?](#)

oldieparavoc - October 3, 2024, 11:52 am

Hi, what is a good no distribute file scanner?

Bastille - October 3, 2024, 11:55 am

Hello,

As far as I know this one is often used :

- <https://www.kleenscan.com/index>

SIM-5186353 - October 3, 2024, 12:12 pm

I'm not pretty sure about this one, but take a look. <https://www.virscan.org>

Kleenscan is okay, but it does not execute files in a sandbox, so keep that in mind.

I honestly have stuck with the good old avcheck, however always best to do your own testing in a controlled environment.

Sand Ferret - October 3, 2024, 3:04 pm

Your own VM's running whatever AV's you want to test.

Every runtime scanner I have tested is dog shit and gives inaccurate results.

Thanks for the heads up, but what does that mean for the result ? I mean, if I run something on my computer I'm glad to have a sandbox, but on an online tool what's the cons not having a sandbox ?
