Thread: [If you could make a living doing absolutely anything, what would it be?](#)

One of my favorite things to do in my free time is to just relax and play videogames. I barely have enough time in my usual day to play for too long though, and gaming was definitely not going to be an option for me as a career. If I could choose absolutely anything, though, I'd probably choose gaming. How about you?

I'd like to be a comedian. I like making people laugh. I just think I'm too lazy to sit down and write material. I have wanted to write a tv show for 15 years now but I never get around to it.

My hobby is computers and I'm already working in cybersecurity, during my free time I also like to explore other sub-domains of IT such as hacking, electronic, coding, even history, retro-computers, and so on.

Sometimes I can do something boring at work, but I think it's not a big deal and not the biggest part of my job so. I'm good with my current situation to be honest

Probably what I'm doing right now. I've always had the dream of working for myself, running my own business, and that's what I'm currently doing. My only dream from here in regards to my business, is for it to get bigger. I have a lot of plans and goals on where I will grow things, I'm just hoping I can follow thru with these plans.

Must be pretty nice being in a job that you thoroughly enjoy working at. I'm not saying that I don't like my job, I do, actually, but if given the option, I'd rather do something else.
