Received a review copy for this method. This seems very promising, not your typical torrent or game hacks spreading method, it's very clever. It might take a little investment, but nothing over like \$30. If you're smart with it you can even target what targets you're looking for, certain hardware requirements, location, ETC.

Will post results as well once I give it a try.

Daily gave me \$1500 to sell my guide.

This is the same guide I sold for \$250 that was vouched by X-DB and ZELOS.

Can do a thorough review, I'm a full stack dev and been in the scene for years, would be able to thoroughly examine the idea and get results quickly as I have the funds to "pad this up" and see how well it can really do :) just let me know
