Hello admin and all members

So i was suggesting to add gender option and country flag, so its(optional) u can add them to be on your posts

I think this can be applied to mybb forums including hf ofc

Wanna hear your opinions?

Ok seems like a bad idea, thanx all for your opinions

Literally I remove as much identifying information as possible. Something like country or gender may expose people to even things like prejudice.

One issue is when members say they are women, they get harassed. And sometimes men get weird and pretend they are women. So basically gender is really a problem to have on the site.
