Thread: [Any resources you can recommend to learn how to crypt files, obfuscation?](#)

Ascendancy - October 11, 2024, 6:55 am

Would love to learn how to crypt, but where do I start? Can anyone recommend any resources you have used or any particular places you know of? Thank you very much.

Haha very true, this is why I signed up! I just thought if anyone knew direct resources that helped them they could share but I'll scout around instead!

M*a*I*d*e*v Academy - if you don't have the cash to pay for it, you can find links to zips often enough on Telegram and other free course sites. (HF censors the name, idk why, but it's a popular resource)

Sektor7 courses - a bit more advanced / not so direct spoonfed techniques, but still good for learning the basics and more advanced tactics.

Good luck!
