Thread: [If You Could Bring Back One Discontinued Product, What Would It Be?](#)

Epic - October 11, 2024, 10:34 am

Hello HF,

Checking in with another Octoberfest lounge thread. Wanted to see if there are any discontinued products that you wish were still in production.

Personally I've got to go with the steam controller. Such a great piece of tech at the time, I actually still have mine and it still works. I don't think it really caught on super heavy, but the customization and functionality made it an amazing controller in my opinion. The track pads offered a precise way to play without using analog sticks. I used it to play almost everything that wasn't a FPS or strategy game back on the day, I've since moved to almost strictly mouse and keyboard though.

I once heard that they had submitted another patent for a new controller, but haven't heard anything since...

Have any of you ever used the steam controller? Are there any other products you wish were still being made?

Let's hear it.

The Mcrib is ok in my opinion. Has it been fully discontinued? I feel like I saw it a few years ago but I could be wrong.

I would want the Taco Bell's cheesy potato burrito or the Fiery Doritos Locos Tacos. I know there is a regular Doritos Locos Taco but it just doesn't have any flavor to it.

anydineiodine - October 11, 2024, 1:35 pm

somewhere in the mid 90s Taco Bell had bacon soft tacos and I want them back

I would probably bring back AOL. America OnLine was the first "social" platform that I used that was connected to the internet, and the first platform that I learned about spamming and internet marketing with. It's crazy to see that today it's merely an email service, when at one point n time you couldn't go anywhere without seeing AOL somewhere.

SKITTLES LIME. THE ENTIRE PACK WAS LIME. I don't give a shit about any flavor. I loved eatin pine-sol flavored skittles. For real.

Yeah, me too. I was in middle school around the time of AOL.. still a young buck, learning what life was all about. AOL used to be the shit. I never did end up getting into ICQ, but I did use AOLs messenger, AIM. Had a bunch of friends from school on there, as well as a bunch of online friends.

NO FEAR Energy drink. I loved that one. It was my breakfast for years until Pepsi bought out the company and killed it.

I would love to see the return of certain video game consoles like the Nintendo 64. It had such great games.
