Thread: [Which tech gadget can you not live without?](#)

sharn - October 12, 2024, 9:46 am

I absolutely need my smartphone! It keeps me connected through calls, texts, and social media. It also helps me manage my schedule and navigate while traveling.

What gadget is something you cannot imagine living without?

Phones are essential in my daily life, but honestly, I can't go without a laptop or computer. I'm totally hooked on them.

I voted for smartphone. They're just tied into so many other aspects of life at this point.

Out of those options, smartphone

I'll go with both PC and phone, because you need them to make money, let's be honest.

Definitely a computer and phone. I pretty much need a cell phone for my job and along with staying in touch with family and friends. I also need a PC for work and other miscellaneous stuff.

When I was a kid I'd always have those sake board tech decks during middle school those were the best times.

I can't go without my smartphone. I am not addicted to using my phone but I do use it to stay connected with others on a daily basis.

without any doubt it would be my phone. My phone can complete any task my other devices can...

Not to the same level but I cant make a phone call on my Xbox.
