Thread: [\[Amature\] Freelance C++ Mal-Dev/Dev](#)

Biggy_Asian - *October 12, 2024, 3:47 pm*

I can write you something in C++. Nothing that complex fairly simple but should get the job done. I don't guarantee things to be FUD/UD nor do I offer said services.

Example of something I could write you:

Payload stub

Dropper

Some sort of DLL

etc

I am an amature and by no means that good. Your money will fund my new pc so I can leave my I5 laptop. Thanks

DM me. Interested to work on a small C++ dropper

Menace9911 - *February 4, 2025, 6:38 am*

Interested in something small can you send me a msg?

samasugeti - *March 7, 2025, 12:00 am*

how fast it get detected?
