Thread: [Looking for Shopify Theme Suggestions!](#)

totalcontrol123 - October 13, 2024, 3:48 am

Hi everyone,

I'm looking for some help finding free paid Shopify themes. My online store could really use a better theme, but right now money's a bit tight. If anyone knows where I can find one or if there's an AI app that can create custom themes, I'd love some suggestions!

Also, does anyone here run their own store? Whether it's dropshipping, print-on-demand, or something else, I'd love to hear about your experiences!

Thanks in advance!

(Oct 13, 2024 04:14 AM)php Wrote: [\[CITE\]](#) You can start by setting up a local environment to customize Shopify themes. Using a base like Shopify's Dawn theme allows for extensive modifications tailored to your needs. Additionally, AI tools such as Claude 3.5 Sonnet with [cursor.sh](#) can enhance your design process, but be mindful of the telemetry data they collect.

Useful ResourcesShopify.dev - Themes Overview:
[This comprehensive guide](#) covers theme architecture, Liquid templating, and best practices for developing and customizing themes.

Dawn Theme (GitHub):

I've thought a lot about building a Shopify Print on Demand store, but I always chicken out.

what makes you want to chicken out ?

my project is unique in a way. i am the owner of a 4200 nft collection which will launch next year. im putting 420 of the characters on merch items. if you own one of the 420 you will get 10% from sales which feature your character. an active utility for investors. i just lack promotional skills.
