sharn - October 13, 2024, 9:33 am

I would rather never drink coffee again.

Giving up chocolate, especially chocolate desserts would be too hard.

What would you give up?

Deany - October 13, 2024, 9:37 am

I'd choose never eat chocolate again. I don't really eat it a lot anyway.

Prawnster - October 13, 2024, 9:39 am

I don't really eat chocolate much but I also am not a fan of coffee at all, I'm not a fan of hot drinks in general so think I'd go with never having coffee haha.

ahw9n2io8wd9h - October 13, 2024, 9:39 am

I'd rather have both, but I can live without chocolate.

Moooookie - October 13, 2024, 9:55 am

I think I could do with out the coffee. While I'm not the biggest chocolate eater, if I had to pick between the two.. I'm getting rid of the coffee.

Mr_Kh4os - October 13, 2024, 9:58 am

I could never give up coffee haha so the chocolate definitely has to go!

Mercury - October 13, 2024, 9:59 am

I'd sacrifice chocolate over coffee all day, any day. Coffee is my fucking livelihood.

Yin Yang - October 13, 2024, 7:43 pm

I'll give up chocolate no prob.

Pigley - October 13, 2024, 8:09 pm

A life without coffee, eh?

How dare you even suggest such a possibility?

BLASPHEMY!

Seriously, I would never give up coffee.

I drink coffee from a mug. :-)

Sahgid - October 13, 2024, 8:12 pm

I couldn't decide. I like both. Maybe coffee because chocolate treats create more possibilities.

Vip?r - October 13, 2024, 8:19 pm

never drink coffee, I am fine with just tea

Cap - October 13, 2024, 8:24 pm

I'd definitely choose to get rid of chocolate. I'm honestly not a fan of it anyways. Coffee on the other hand, I'm obsessed with.

Never drink coffee. Easy.

Pimping - October 13, 2024, 9:40 pm

Hmmm i'll have to go with giving up coffee even though i love it
not eating chocolate at all would be super hard and a lot of different things are made with it

Syndicate - October 13, 2024, 9:46 pm

There's no possible way I could live without coffee. I already do not eat chocolate. I maybe have it every few weeks or so

Yanix - October 13, 2024, 10:01 pm

I used to drink chocolate coffee so would it be consider as coffee or on the chocolate side? lol

Prince™ - October 13, 2024, 10:24 pm

I personally wouldn't mind living without Chocolate. Never been a fan of it, I think chocolates are very overrated as well.

On the other hand, Coffee though!! OP!

Aurelius - October 14, 2024, 5:59 am

i don't drink coffe much i prefer tea but if i had to choose between tea and chocolate its def never eat chocolate again not a sweet enjoyer sweet make me feel dizzy

Chrome - October 14, 2024, 8:44 am

This is an easy one for me, I will give up Chocolate as I barely eat it anyway haha.

Koyote - October 14, 2024, 8:50 am

I don't really drink coffee, so that can go and I'd be fine.

Epic - October 14, 2024, 6:32 pm

I could not give up coffee. I'll have to pick chocolates. Chocolate is good, but a lot of other sweet exist. There is only one coffee.

630 - October 14, 2024, 6:46 pm

I'd probably give up coffee. I'm not a big sweets fan.

Jake Johnson - October 14, 2024, 6:50 pm

I would easily give up coffee because I am not a big fan of coffee. I mean I'm not the biggest chocolate person either but there is chocolate in a lot of tasty things that I would miss out on.

Doug Dimmadome - October 14, 2024, 6:52 pm

Never drink coffee again. There are so many other ways to get caffeine, but no other way to get chocolate. There's Coke, Red Bull, caffeinated chocolate, tea, etc.

Angrybird945 - October 14, 2024, 8:50 pm

Not a coffee person, so I don't mind getting rid of it. Even if I add creamer and other stuff, it tastes gross until I remove the coffee part lmao.

notnxiu23 - October 15, 2024, 1:39 am

I would rather give up chocolate despite of me being a sweets guy.

Coffee can be used to be more productive and it helps when I am grinding

Jamika - October 15, 2024, 3:59 am

Never drink coffee, iam not that fan of coffee anyway ?

UltraexTrader - October 15, 2024, 4:42 am

I would easily give up on the chocolate.

Zalbai - October 15, 2024, 5:34 am

If I understand correctly, you shouldn't equate chocolate and coffee. Chocolate has a calming, pleasurable effect when consumed and can lift your mood, while coffee mainly provides a quick energy boost and increased alertness.

If I were to drink coffee, I would avoid it for this main reason: the intensity of the aging process increases significantly...

The Pact - October 15, 2024, 6:16 am

I had a decaf today. I've given up non decaf.

Binance - March 20, 2025, 3:39 pm

goodbye chocolate lol
coffee is my life blood.

XtremeDiscount - March 20, 2025, 6:26 pm

Ill choose never to eat chocolate again without hesitation. I had acne when I was younger and keep sugar consumption to a minimum and only drink water and it helped a lot. In middle school I would drink a lot of redbull and soda, switched to espresso / coffee and I learned in highschool soda dehydrates you more than it hydrates you. I always looked at Soda as a refreshing beverage and cut it out right away and drink seltzer or water now and have espresso when I need a boost. That or the Vyvance I'm now prescribed haha. Chocoloate is one of those things I avoid now. I don't have diabetes or nothing but just turned off by extra sugar. And yes Chocolate especially dark has health benifets but who needs a bunch of sweet shit, when you can drink coffee and push through the day.

Sam - March 20, 2025, 6:46 pm

I could live without chocolate but coffee on the other hand is part of my daily routine. The caffeine, a

natural stimulant that perks you up, sharpens your focus, and makes mornings bearable.

jcole - March 20, 2025, 7:02 pm

I drink Monster energy drinks daily and am not that into coffee. I'll keep the chocolate..

wutangas - March 26, 2025, 2:57 pm

Coffee is a must everyday to keep me going, I can go without chocolate easily

Crystal Lord - March 27, 2025, 12:14 pm

Hmmm... Not really hard to answer on this, i dont drink coffee, and i rarely eat chocolate i mean i can exclude both. But if i have to chose it would be coffee since i dont drink it.

gwiz - March 27, 2025, 1:36 pm

Idk, I don't eat chocolate often but I wouldn't want to give it up. I drink coffee everyday but honestly it's not healthy on the heart, plus, I could substitute it with pure caffeine and be just fine.

Would probably let the coffee go.

Prepper - March 27, 2025, 1:41 pm

I don't drink coffee so this is easy for me.

Reeses Fastbreak and reeses cups are SAFE!.

Beherit - March 27, 2025, 1:43 pm

ariluvs - July 2, 2025, 7:19 pm

never drink coffee, everything has chocolate in it nowadays

K4RM4 - August 18, 2025, 7:00 am

I'm going to have to go with Chocolate. I'm more of a gummy bears kind of guy. And I honestly don't believe I would survive without my coffee lol.

Oh_Well - August 18, 2025, 7:27 am

If I had to pick, I'd choose not to eat chocolate again.

I'm a huge coffee lover, I couldn't start my days without it.

SirBets - August 18, 2025, 7:39 am

I'd probably cut out chocolate. It tastes good, but I lean on coffee way more often

jujuju - August 31, 2025, 6:37 pm

This question is harder than "saving mom or wife"! Let me tell you—why not let coffee and chocolate get married on the spot? Then I can just drink a mocha and have the best of both worlds. Force me to choose one? Then I choose to cry!

Squixey - August 31, 2025, 6:40 pm

I would had left coffee for chocolate as for me chocolate has always awarded me with energy when I felt weak while working physically or mentally where as coffee has made me weak after drinking and working for too long. Choco ftw! ?

xxthegam3xx - August 31, 2025, 11:18 pm

Never drink coffee definitely

Th3SiNz - September 2, 2025, 12:31 am

Coffee, I can substitute it out very easily

kuraANT - September 2, 2025, 8:31 am

I'd give up coffee too — I like it but I can live without it. Chocolate though? No way. Especially dark chocolate. That's a deal breaker.

SpiritualDose - September 2, 2025, 8:39 am

trololololo - January 31, 2026, 5:31 pm

never eat chocolate again lol

newproject20256 - February 8, 2026, 3:51 am

I always never liked chocolate

DeITex - February 8, 2026, 4:08 am

Coffee. Easy. Caffeine pills are \$10-\$15 for 100 pills at 200mg each. A "cup of joe" has like...85-95mg? Not a "kick in the pants" kinda caffeine freak? Cut the pill and drop it in some tea, Gatorade, soup, whatever.

Plus, the pre ground stuffs got smashed up roach's in it. And the whole beans still had them crawling in them before they were packaged. Google it if you don't know it already. I'll link some stuff on it if you're lazy.

brianandy - February 9, 2026, 12:34 pm

Coffee always, Chocolate can go forever.

?ystem - February 9, 2026, 2:56 pm

Cooligan - February 17, 2026, 7:59 pm

Never have chocolate again. I'm honestly not a huge chocolate fan. I do love chocolate don't get me wrong, especially a nice milk chocolate bar with some milk, always hits the spot.

As I've grown older though, chocolate and other candy just isn't a part of my diet anymore. The ONLY candy I still eat, is JOYRIDE. It's a candy company founded and ran by the YouTuber @RyanTrahan (YT = @ryan).

Each type of candy he releases are all very healthy alternatives to what else is on the market. There's only natural and no artificial ingredients, no high-fructose corn syrup, no crazy amounts of sugar, only pure ingredients. I think all bags have a max of 4g of sugar per serving which is incredibly low for any candy. What really makes Joyride truly different though are its other ingredients. No synthetic colors (why their "Blue Raspberry" flavor is actually colored purple and not a fake bright blue), all of his candy is plant-based and vegan, non-GMO, and last but definitely not least, pre-biotic fiber for gut health support.

From his website: <https://www.joyridesweets.com/products/sour-blue-raspberry-strips>

From Walmart in case his site doesn't ship to your location:

<https://www.walmart.com/ip/1X-JOYRIDE-joyride-sour-blue-raspberry-strips-IN-HAND-SHIPS-FAST-3-5-OZ-CANDY/15168960038>

*My favorite kind are the Blue Raspberry sour strips, they're so good. Also, the sour Watermelon Wedges are very very good as well. The watermelon wedge gummies don't even have that wicked thick gummy feeling, or aftertaste either.
