Project Proposal: LUDO Game Development with Online Crypto Deposit and Withdrawal

Project Overview:

We are seeking a developer or development team to build a LUDO board game with the following key features:

1. Multiplayer Functionality – The game should support real-time multiplayer gameplay for 2-4 players.
2. Crypto Payment Integration – The game must allow players to deposit and withdraw funds using cryptocurrencies.
3. Secure Wallet System – The system should include secure wallet functionality to manage player deposits and withdrawals.
4. In-Game Currency – Players will use an in-game token system linked to crypto transactions.
5. Admin Dashboard – A back-end dashboard for admin control to manage users, crypto transactions, and monitor game activities.

Key Features:

1. Game Mechanics:

- Classic LUDO gameplay rules.
- Ability to play with random online users or invite friends to a private room.
- Multiple game modes (e.g., quick game, tournament mode, etc.).

2. Cryptocurrency Integration:

- Ability to deposit and withdraw funds using popular cryptocurrencies like Bitcoin, Ethereum, etc.
- Integration of crypto wallet services with support for multiple crypto wallets.
- Real-time transaction confirmation and security protocols (blockchain technology).
- Integration of a payment gateway for crypto transactions.

3. In-Game Economy:

- Players use an in-game currency or token for wagering and winning.
- Option for players to convert in-game tokens back to cryptocurrency.

4. Security:

- High-level security to ensure safe deposits, withdrawals, and gameplay.
- Protection against fraud, hacks, and game manipulation.

5. Admin Panel:

- Manage users, games, transactions, and monitor activity.
- Track real-time earnings, deposits, and withdrawals.
- Game statistics and user reports for management.

Additional Requirements:

- The game should be available on Android and iOS platforms.
- Option to integrate KYC (Know Your Customer) for user verification.
- 1-year post-launch support for maintenance and updates.
