Good morning everybody. I finally secured a copy of Romulus and watched it for the first time last night. I really enjoyed this movie on account of the familiar elements that sort of tie it in with the original film. I've been a huge fan of this franchise since I was just a kid. So, I'm curious if there are any other fans here. Did you watch this and if so (without spoiling anything) how did you feel about it?

Not yet, but could be interesting to watch it for Halloween I think,

I guess that the last Alien movie I've watched was the one with the baby Alien Covenant (something like that?), wasn't very fond of this one, however I liked a lot Alien Prometheus !!

Yes watched it the other night in peace at home on a 55 inch screen at 1080p (4K is not much difference to my old eyes), and with no fat fucks head in front of me, and I completely agree it's a great film, I really enjoyed it, no spoilers just watch it, although you probably need to have seen at least Prometheus & Covenant first to kind of understand it. Personally I watch all of them every time they come on the TV. I must have seen Aliens more times than i've pissed on a cat. Ok I've never pissed on a cat but I'd like too as long as it didn't scratch my dick off, anyway I digress yes great film.

Download it and Watch it now...

I enjoyed this one quite a bit and liked where it wound up in the end.

I saw it at the drive-in theater the weekend it came out with my dad and brother.

It gave me the survival video games vibe and I liked it.
