Thread: [MyBB Tabbed Menu plugin issues \[Solved\]](#)

SIM-587985 - October 15, 2024, 1:38 pm

Plugin: MyBB Tabbed Menu 2.2 Author

Plugin Post:

<http://web.archive.org/web/20191230094454/http://www.mybbcentral.com/thread-7687.html>

Plugin link: <https://community.mybb.com/thread-230891.html>

Whenever I have the plugin activated, I get a completely blank page instead of a normal index page.

Any idea what the problem could be?

MyBB Version 1.8.38

(Oct 15, 2024 02:55 PM)m0hx Wrote: [\[CITE\]](#) check the error log history, it's probably old plugin that is not compatible.

post the errors related to ur code/plugin.

Where is the error log?

Thanks for the help, been like 15 years since I have messed with MyBB

(Oct 15, 2024 03:06 PM)m0hx Wrote: [\[CITE\]](#) no idea lol.

if ur running xampp then its in the control center/ there's access.log // error.log // php.logs ?idk

or check whatever ur host error logs they must have php section or smthn.

or in mybb there's section for logs.

(Oct 15, 2024 03:18 PM)m0hx Wrote: [\[CITE\]](#) f, there's some errors in it that's y. it won't work. u must fix em.

open tab_menu.php

look on those specific lines where the errors are, try to fix 'em

i could help u but im goin out and come back sleep atm >.< mayb tomo i'll do.

No need, fixed that error and another on line 170 for PHP version.

Will post updated code in the original post.
