Thread: [Mybb theme development sources](#)

**Radi** - October 15, 2024, 8:57 pm

So I have been trying to find videos or decently documented method of learning how to develop a Mybb theme and needing some help with this now.

If there is a paid method of learning like Udemy (warez disallowed) or some other website please guide me or where I can learn for free I am truly interested in learning to code Mybb themes.

The reason why I'm asking is since people are putting insane prices on Mybb themes and so re-motivated me to create my own.

Thanks

I'll develop a theme for you for \$100-\$200 you pick the price.

Let me know

Just start with the default and google how to change each thing individually at first until you become an expert.

Seems like the name of the game nowadays
