Thread: [\[Looking\] MyBB Plugin for usergroup reputation](#)

SIM-587985 - October 16, 2024, 10:38 am

Hello, looking for a MyBB plugin that would let user groups have a profile page consisting of a few fields and a reputation.

Similar to this crew page for the HF game

<https://hackforums.net/gamecp.php?action=crewprofile&id=30#lgy>

Except the game would be gaining and losing reputation, which members of other groups could give in intervals of 1. Ideally, there would be space to add a few pieces of information, 2 profile pictures and a page that lists the groups by reputation.

If one doesn't exist, recommendations for people worth their salt at making plugins that won't charge me a bunch of money. Thanks in advance.

If one doesn't exist, recommendations for people worth their salt at making plugins would be nice too. Thanks for the help,

Could you explain it a bit more as in what do you mean by user groups having reputation?

Sure, after closer examination it seems I need a little more than initially expected.

I need all the usergroups to have a page similar to a user profile page with a profile pic, bio, and reputation. I want other members to +1 or -1 said group.

Guess it's looking more like the custom plugin option
