I guess that it depends on the Android OS version, do you know it ? Do you know the model of the phone too ?

Probably. If it's running Android 6 or earlier.

I'm being a little negative because the poster of the below threads couldn't do it (he multi-posted and got closed). Maybe he was just incompetent.

If you look it up on github "android pin brute force" you'll see there's a bunch of scripts to try.
