I guess your chances of getting good answers will increase if you clarify what type of malware you want help spreading.

At least email-based spreading requires clever social engineering to be effective.

BigDy - October 19, 2024, 2:15 pm

I'm using Xworm

So I want a way to bypass email security considering the payload file is in a restricted file format

PitbullIT0r - October 20, 2024, 10:56 am

Give a read to this thread, its a bit older but explain good a lot of spreading methods.

[Spreading methods.](#)

Email is usually tricky because of all the filters & stuff, have you tried other methods like maybe spreading through torrents/game hacks?
