Thread: [Ask for hacking tutorial you would like to see](#)

Bastille - October 20, 2024, 10:05 am

Welcome to the ?REQUEST OFFICE FOR HACKING TUTORIALS? > Ask for any tutorial you would like to see(1) <

Recently I've been interested a lot in black hat activities and methods, and I really enjoyed making tutorials about hacking. Aside of that, I think that it's a great way to bring more HQ content on HF, especially about the hacking field.

Many beginners come to HF and ask how to do certain things, most of the time they ask for the same thing. The objective of this thread is to gather all important tutorials and the most requested and act as a good entry point for new members looking for tutorials. Besides, you can also submit your requests, such as what you would like to see more on HF.

You're free to request for tutorials, or to make ones and ask that they appear here.

(1) : Be aware that the rules of HF still apply here, so few topics cannot be discussed and developed for obvious reasons. Do not ask for tutorials which could go against the rules. Regarding this, please take a look at the [Help Docs](#) and at the following thread : <https://hackforums.net/showthread.php?tid=5981318>

By the way, I want to avoid the usual questions such as : How to do SQL injection ?
How to do XSS attack ?

These things can easily be answered with ChatGPT and with courses on training platforms such as Tryhackme or Hackthebox. If someone wants to make HQ thread / tutorial about these topics they are free, however I'll not spend my time doing what already exists.

1. AVAILABLE TUTORIALS

<https://hackforums.net/showthread.php?tid=6282321>
<https://hackforums.net/showthread.php?tid=6282758>
<https://hackforums.net/showthread.php?tid=6284659>
<https://hackforums.net/showthread.php?tid=6286334>
<https://hackforums.net/showthread.php?tid=6287522>
<https://hackforums.net/showthread.php?tid=6288583>
<https://hackforums.net/showthread.php?tid=6289208>

2. PENDING

How to hack smart cameras
How to clone RFID cards
How to crack passwords
How to hack .onion web servers
Performing Linux Privilege Escalation

"an wifi network with an external Wifi Card that would give the users access to the internet but would be capturing everything they would do"

IMPORTANT : Don't forget that MoTM is back and you can get an award based on the quality of your membership on HF. Bringing HQ threads will help for sure ...

webcheating - October 21, 2024, 8:51 am

hi, I'd like to learn more about privilege escalation in Linux in real-world scenarios. Recently, I managed to get a reverse shell on a server (Linux host1828359 4.19.0-20-amd64 #1 SMP Debian 4.19.235-1 (2022-03-17) x86_64 x86_64 x86_64 GNU/Linux). I scanned for vulnerabilities using LinuxExploitSuggester and checked the system based on the hacktricks.xyz checklist. However, none of the CVEs worked due to missing dependencies and libraries like libbsd and shadow, which I can't install since I don't have root privileges. Also, building from source kept throwing new errors every time I fixed the previous ones. I also tried searching for SUID files, writable directories/files, .conf files, and other typical privilege escalation vectors, but nothing useful came up. In the end, I still couldn't get root or the password of any other user. What would you recommend in situations like this, and in general, when it comes to privilege escalation in real-world scenarios? Maybe there are some tips or tricks you could share?

Thanks in advance!

ttbr0 - October 22, 2024, 2:17 am

got a taste of the dark side have ya? interested in seeing your future contributions

Bastille - October 22, 2024, 2:57 am

Hello, thanks for your suggestion, I'll work on it soon and let you know when it's ready

anov - October 30, 2024, 11:49 pm

Very very good detailed thread. Ill be sure to like it and encourage others to keep this thread alive. I am new here as well so this is great initiative you are doing!

How do I put push notifications to whenever you post something? That'd be great to see your threads more

P.S. you can try to upload a thread on how to make an auto executable bypass usb malware drive. That'd be pretty interesting

Jokinha - October 31, 2024, 9:59 am

I would like a tutorial on how to set up an wifi network with an external Wifi Card that would give the users access to the internet but would be capturing everything they would do. Basically I think it's a Man-in-the-middle attack.

Thanks for your post buddy ! On my profile, you can click on the three dots, then "Follow this member"

Good idea, I'll work on it ;)

Hello, just made the tutorial requested, take a look here :

<https://hackforums.net/showthread.php?tid=6287522>

padrino - January 6, 2025, 3:17 am

great thread! will be keeping an eye on this, lots to learn.

Bastille - January 6, 2025, 11:52 am

(Jan 6, 2025 04:17 AM)padrino Wrote: [\[CITE\]](#) great thread! will be keeping an eye on this, lots to learn.

Thanks buddy, if you have any idea feel free to ask, I'll try to make a tutorial about it (but don't

forget that your request must follow the rules of the forum, in the [Help Docs](#))

sadmin - January 9, 2025, 7:40 pm

Seconding this, i'd love to learn more about wifi attacks and monitoring users on wifi

papa101 - February 10, 2025, 7:12 am

who can teach me how to hack username and password of emails

SIM-5614029 - February 17, 2025, 7:07 am

Hiya,

Would you do a tutorial on IP tracking in the form if Spy pixels and such?

I would consider this a method of lesser interaction since the target only has to click on a seeming innocent mail.

By "such" i mean more methods of lesser interaction!

Thank you

Bastille - February 17, 2025, 11:35 pm

Hello, that's an interesting topic, I will try to make a thread about it.

Thanks for the suggestion !

Sure thing,

Also another one:

It is based on pop-ups that are shown on the targets browser.

There was a seller on hf for this but he exit scammed i think.. Project doesnt seem active at this moment.

I found a article about it here :

<https://geotargetly.com/blog/exit-intent-pop-up>

The hf article:

<https://hackforums.net/showthread.php?tid=6271704>

Bye

Pp_dd - May 27, 2025, 6:59 am

Thank you, your sharing is really useful. Although I usually need to use a translator to read your posts.

I'm so sorry. Can you remind me when this series is updated? I don't know how to subscribe to this post yet.

DrunkScottie - May 27, 2025, 7:19 am

A basic tutorial on Coding a Scantime & Runtime Crypter + RunPE in C# or even repurposing a pre-built source. There are lots of people into RAT'ing and along the years one of the biggest tools people need is to be able to create crypters.

There is some documentation out there, but I believe this would serve a long standing interest of a lot of hacker communities, I'm almost certainly wrong to suggest the point it seems like crypter developers have died out in droves, and if this is the case; this is a craft that needs to survive for the future of hacking as a whole, it could serve to preserve, and to give birth to the next generation of developers.

Programing is out of my scope, and I'm sure there are a couple of tutorials on this topic already on HF :

<https://hackforums.net/showthread.php?tid=6265473>

<https://hackforums.net/showthread.php?tid=6291659>

<https://hackforums.net/showthread.php?tid=6290915>

<https://hackforums.net/showthread.php?tid=6271970>

<https://hackforums.net/showthread.php?tid=6273509>

I've started to learn C but don't have enough time right now to continue, could go with malware programing in a year, when I would reach my goals and could start working on new things.

frogval - May 29, 2025, 10:01 pm

I would like a tutorial on sql injection

Bastille - May 30, 2025, 12:29 am

(May 29, 2025 10:01 PM)frogval Wrote: [\[CITE\]](#) I would like a tutorial on sql injection

There are a lot of tutorials on this topic already. If you want to learn and practice on vulnerable websites take a look at my thread here : <https://hackforums.net/showthread.php?tid=6298815>

There are many rooms to learn and practice SQL injections. The rooms listed in the thread are ALL FREE.

Don't forget to leave a comment in the thread I linked, it keeps me motivated to continue to provide content to the community

SALLYSAKSON - *October 19, 2025, 6:07 am*

Thank you

R5N3T - *December 15, 2025, 7:08 am*

Please create the latest SQL injection tutorial for 2025

Bastille - *December 19, 2025, 5:15 pm*

(Dec 15, 2025 08:08 AM)tuyulperang Wrote: [\[CITE\]](#) Please create the latest SQL injection tutorial for 2025

SQL injections never changed, there are not new SQL injections, this vulnerability relies on lake of securites from IT. But I could make a thead of tryhackme rooms where you could learn SQL injections if you would like, to learn.

R5N3T - *December 19, 2025, 6:39 pm*

A thread compiling TryHackMe rooms focused on SQL injection would be very useful, especially for someone like me who wants hands-on practice. I'd definitely be interested in learning from it.

trinhnam85 - *December 30, 2025, 4:12 am*

I'd like your help looking into the issue of domain spoofing in emails. Thank you.

Kathail - *December 30, 2025, 11:09 am*

wordpress and WAF by-passes :)

K4RM4 - *January 13, 2026, 3:46 pm*

As someone who is still new to the scene, I'm open to any and all tutorials I can get my hands on. The more I can learn the better, so I will definitely be checking out what you've shared and look forward to future projects.

training_tytem - *February 9, 2026, 9:38 pm*

Are you still making tutorials
