We all have interests we'd love to explore but haven't had the chance to dive into yet. Whether it's painting, learning an instrument, or something more adventurous like rock climbing, let's share our aspirations! What hobby have you been wanting to pick up, and what's holding you back?

Pikachu - October 18, 2024, 9:25 pm

Programming, I have some knowledge regarding Python but I'm a beginner, I would like to dive into C/C++, and Assembly, for reverse engineering / malware analysis

I can understand wanting to do those with someone else. It's always more fun to share those experiences. Do you have a specific location in mind where you'd like to try them?

Python is a great language to have as a foundation, and C# opens up a lot of opportunities, especially in game development and software applications.

I've always wanted to try photography. Capturing moments and exploring creativity through different angles and lighting sounds like a lot of fun.
