Thread: [Whats One Fictional World Youd Love to Live In?](#)

**Game** - October 22, 2024, 8:47 am

If you could pack up and move to any fictional universe, which one would it be and why?

Would you join the wizarding world of Harry Potter? Explore the vast galaxies of Star Wars? Or maybe dive deep into the world of your favorite video game?

Share the universe you'd want to live in and what role you'd play. Don't hold back!

Me personally, I'd love to live in Dragon Ball Z.

I would love to live in the Halo Reach world. Such a beautiful landscape.

I can't argue with that, it is nice. Would you become a Spartan?

Me personally, I'd love to live in Dragon Ball Z.

It's hard for me to decide on one option. I think I would love to see myself in the universe of witcher, cyberpunk, but yes I would most like to find myself in the world of Jakub Wedrowycz (It's a Polish fantasy written by one of the masters of the pen, Andrzej Pilipiuk. In a nutshell it's a kind of witcher only that Gerald is an old alcoholic and villager ?).
