Thread: [Are you left-handed or right-handed?](#)

SuseGD - October 23, 2024, 7:44 pm

I'm left-handed; I do everything with my left hand, and I can do basically nothing with my right. It's quite interesting to me how one hand becomes dominant over the other, and we don't really know why. What causes someone to be left-handed or right handed?

I've included a poll for you all to answer, and I've even added a third option for you ambidextrous people out there (lucky!)

Right handed all the way
not sure what causes some people to be left handed

I mostly do all my work at right-hand. Left-hand is only for support. ?

I still remember one time when I was a kid, did exercise to learn both hands, never succeed, right handed as well.

I am mostly right-handed, but there are a few tasks I do with my left hand (like certain sports or using some tools).

That's pretty cool that you're able to use your non-dominant hand for some tasks! I can't do literally anything with my right hand, so I'm heavily dependent on my left. What sports do you play that require your non-dominant hand?

Thank you! I actually switch to my left hand for basketball.

I use my right hand as my primary however I can use my left as I broke my hand(I think I mentioned it here at some point) so I had to start using my left for 3-4 months and once you learn it tbh it's just in your head I even sometimes catch myself switching depending on what it is haha.

Like you would never know but when I flip my hand over I have a wicked scar xD.
