I prefer sunny, warm days.

They make me feel happy and there are perfect for spending time outside.

What is your favorite type of weather?

Deany - October 24, 2024, 7:30 am

My favorite is rainy weather !

I'm a big fan of both summer and winter.

Where I grew up has season changes, and the winters can get brutal, especially with snow. But I love it at the same time.

I also enjoy summer, but am not a fan of getting all sweaty. Much easier to warm up than cool off.

I prefer a decent weather but not crazy hot. The sun hurts my eyeballs tbh. Maybe a nice 20 degrees (68F) is good.

I think Warm mainly because that means summer and doing fun stuff, also I can wear clothes I like (Usually nice jeans and a shirt).

But I like cooler days too.

I prefer sunny days because I can drive my car fast.

I love cold weather in general. If it is cold and raining.. fantastic. Cold and sunny... lovely. As long as it is cold outside then I am very content.

The heat drags me down and makes me feel sick.

Sunny days are my favourite, not too hot, neither too cold, just an average temperature

Cloudy, rainy, stormy, windy, anything but sunny lol

Cold and super snowy. It's so nice to be outside, it's so calm, so silent, so beautiful and it never really gets dark. I also love to take pics in the wild when it's super snowy, even in snow storms...this winter I'll try to get as much pics n stuff as possible so that I can share it on IG or something.

Rain and thunder storms are also nice. Imagine being wet and coming home, starting up a fire in the fireplace, taking off all the wet clothes, putting on something fluffy n nice, cuddling up with someone in front of the fireplace...one of the best things ever.
