My favorite outdoor place is by the lake. It is perfect for relaxing and enjoying the view.

Do you have a favorite outdoor place?

There's a spot near our home where my wife and I like to walk. It's just so peaceful and will always mean a lot to us, so it'll always be our favourite.

I love to the beach. There is few spots where far from crowded, so peaceful and enjoying the view.

There's a certain hiking trail near me, I go there often by myself to relax and reflect on either the day, week, last hour, whatever it may be on that day.

I think one being in touch with nature and real outdoors is very important for a healthy mindset.

I love to go fishing and explore the wilderness. Sitting by the lake is also a really good time

Ocean, sadly I only get to go to the ocean during summer but I love it so much every single time.
