Thread: [wordpress expert](#)

Hei?eke? - October 24, 2024, 7:00 am

I need a WordPress expert to help me "get started" on a knowledgebase site, I have MinervaKB installed and like their fancy/modern layout of knowledgebase.

We can also change minervraKB to something else, that's not a problem.

I need a knowledgebase with a front page, good looking, categories and subcategories in the categories, for like iOS, iOS Setup guides, iOS issues, under that.

the payment will be 100 euros up on completion of the initial setup.

This means a full setup, a nice index, easy-to-make good-looking categories, and good-looking sub-categories.

One test article can be anything.

Get in touch and we can discuss this over discord, would be good if you have any examples if you have done this before.

[contract=tid]Start Contract[/contract]
