My friend told me about a game called TCG Card Shop Simulator, you basically run a card shop. I have it modded so it's changed to Pokemon cards and it feels really nostalgic. It's a fun game so far and my shop is level 26. You have to re-stock shelves, upgrade your shop, open packs, keep customers happy.. etc. I'm really enjoying it. It's only like \$12.99 on Steam and it's been out for 1 month.

Would you give this type of game a try?

It's a mid game but fun at first. You'll realise later on it gets boring but have fun
