Thread: [What color mouse cursor do you use?](#)

Cooligan - October 24, 2024, 12:40 pm

I've noticed a few people point out that I have a colored cursor, mine's purple, it's my favorite color. My whole system theme is purple accents, I also use HF's purple mobale theme.

My cursor:

What about you guys? Do you also use a custom colored cursor, or do you just use a plain white or black?

Regulus - October 24, 2024, 12:41 pm

White over here, the OG color.

rip - October 24, 2024, 12:42 pm

I use the stock cursor, on both my laptop and desktop. 10+ years ago I got snazzy with all the custom ones, but I like it plain and simple now.

Yani - October 24, 2024, 12:43 pm

I use this beautiful one. It's called Yaru. (Ubuntu Gnome theme)

To me it looks the same as the default Windows black with a white outline cursor.

Miracula - October 24, 2024, 12:52 pm

Used default for the last years, but I remember playing a lot with it's appearance when I was a kid.

I guess it's a proven design.

No mouse cursors on mobile hahaha, When I owned my laptop and used HF I had a maroon color mouse. I used some program that allowed me to customize it which was cool

Bibata Original Classic Black Cursor.

sharn - October 25, 2024, 2:47 am

Just the default white cursor.

It is simple and easy to see.

Hect0r - October 25, 2024, 3:01 am

I always used the default color of every OS I used, maybe I'll try to change it now.

Pimping - October 25, 2024, 3:07 am

I love purple too i just use a white cursor

my HF theme is purple tho

Jinu - October 25, 2024, 3:43 am

I customised it into the mac cursor and loading icon.

HOMODIN - October 25, 2024, 4:02 am

I run with the stock things and to be honest, I didn't think that people actually customize the cursors etc anymore. I used to do that in the good old Winborg XP times (if you know, you know) but haven't ever since. Would be nice to find some cool custom theme for the machine tho so I'll follow this thread to see if I might pick up on some inspiration from here :3

Michael - October 25, 2024, 4:41 am

The original color, don't like it to fancy lol.

I am on phone for hf, but the pc i have The normal white one, my labtop had this one like a hand

pointing a finger, dont know its name

Imagine8 - *October 25, 2024, 5:09 am*

Plain windows white. Who remembers the madness you'd do in back in school etc with the massive mouse trails lmao.

Yoshimitzu - *October 26, 2024, 7:06 am*

After debloating my windows I set it to black.

ahw9n2io8wd9h - *October 26, 2024, 7:08 am*

Completely forgot you could change that lol, I use the default white one.

Game - *October 27, 2024, 12:43 pm*

The windows default white one.

SuseGD - *October 28, 2024, 6:29 pm*

I just use the default white-and-black cursor, I've always been content with it, and I haven't really had a reason to ever switch it out for something else.
