What's Your Favorite Quote and Why?

Hey everyone! I thought it would be interesting to share some of our favorite quotes and the reasons they resonate with us. There are so many wise, funny, and inspiring words out there that can lift our spirits or give us new perspectives.

So, what's a quote that has meaning for you, and why? It can be something famous, something from a friend, or even something you came up with yourself. Looking forward to hearing what everyone shares!

HOMODIN - October 25, 2024, 4:20 am

I have a good one, it hits home and it always reminds me about how I started my overclocking career back in the Socket A era :D

Found this ages ago somewhere on reddit, saved it and later on even put it up on my Steam profile (among a few other quotes n things).

Spoiler ([Click to View](#))

"Every machine is a smoke machine if you operate it wrong enough."

"Every machine is a smoke machine if you operate it wrong enough."

That's a solid quote, especially fitting for anyone into tech and overclocking! It's a humorous reminder of the risks involved when pushing hardware to its limits. Do you have any memorable experiences where you learned this lesson firsthand?

Pikachu - October 25, 2024, 10:26 am

"The more you know, the more you know you don't know anything." -Aristotle

I like this quote because everything about it is true. We're constantly learning new things every day and there's so many things we just don't know about our universe in general. New discoveries are made each and every day. Knowledge is ever expanding.

Jinu - October 25, 2024, 10:28 am

and there's so many things we just don't know about our universe in general. New discoveries are made each and every day. Knowledge is ever expanding.

That's such a profound quote and rings so true! The more we uncover, the more mysteries and questions seem to appear, especially with topics as vast as the universe. It's humbling and inspiring to remember that learning never really ends.

I got a few actually, the most common issue for me was to check that the water cooling block was actually properly seated (might have something to do with weed and/or alcohol consumption back then) and well, fried more than enough CPU's...oh and then I had a super old AMD Duron 800MHz thing that I got clocked up to just shy of 1.6GHz, it managed to boot in to Win XP but then it was just too much, turned in to KFC.

Sounds like you've definitely had some adventures in overclocking! That Duron story is impressive, though. Getting it nearly doubled in speed is no small feat! It's always wild to think about how far you can push these components before they hit their limit (or turn into a crispy snack). Do you still experiment with overclocking, or was that more of a past hobby?

Cooligan - October 26, 2024, 10:53 pm

"If I die, before I wake, I pray thy Lord my soul to take" - The Prayer

This has been my favorite quote for many years now.

Riggs - October 26, 2024, 10:55 pm

What we don't understand we can make mean anything.

Lmao if we're talking about Black Shadow quotes, that list is endless. ?

Game - October 27, 2024, 9:26 am

Life is like a box of choc...

Nah.. um..

"If life gives you lemons, make lemonade".

And the epic speech from Rocky.

These days I don't OC at all, or well, if a customer wants to do a mild OC then we can do it together but that's about it. The CPU's have enough power as is these days for my needs. I still kinda collect old CPU's, I drill a hole in one corner, round their sharp corners and then put a keychain trough the hole :D

SuseGD - October 28, 2024, 6:32 pm

Here's a quote that I live by:

"A genius is someone who can get from A to C without going through B."

It just goes to show that the intended way isn't the only way to do things; there's other methods of doing things as well. Work smarter, not harder.

Clue - October 29, 2024, 3:30 am

"The most important thing in business is honesty, integrity, hardwork... family... never forgetting where we came from... See, ya are what ya are in this world. That's either one of two things: Either you're somebody, or you ain't nobody."

Personally, I think the quote does all the talking it needs to.

?ord Frieza - October 29, 2024, 3:49 am

There are so many good ones out there.

The first one that came to mind when seeing tis thread was

"Integrity is the shield to greed and vanity"-Del

Wow, that's a pretty good quote. It jut goes to show the importance of honor and integrity in our world, and how we should not be sidetracked or distracted by unnecessary or immoral things, like greed, jealousy, etc.
