Ever since you start gambling, you won or lost? I believe we might got some lucky users that broke the casino

at some point I had a notebook to keep a track, was really addicted, but now, deleted everything.

I'm probably down a couple grand. Nothing too crazy.

I tend to win and then lose. Sometimes I'm smart and cash out the winnings though.

Finally I am a looser in gambling.

I'm a new'ish gambler. I've dabbled in the past but never got into it until lately. I'm up big time on horse race betting but apparently I suck at sports betting. Mainly NFL and NHL bets. Definitely makes Sunday football more fun and I limit myself.

Online gambling like roobet/stake, prob down 10-20k. It never ever wins...

In vegas though prob up 10-15k.

So overall down 5k.

Vegas ALWAYS pays though. I'm living in resorts worlds rent free with all the the free offers they sending me.

I have won a SHIT TON of money gambling. But I have lost a SHIT TON of money gambling. I would confidently say myself (and anyone who regularly gambles) is down. I really need to stop but I love the thrill.
